

The Built Environment

Sustainable Building

- Integrated water and waste systems
- Rainwater harvesting
- Wastewater treatment
- Water supply and treated water re-use

Vacuum Sanitation & Drainage

- New-build water saving
- Flexible building refurbishment
- Grease collection for restaurants
- Contained hazardous drainage

Vacuum Waste & Linen Collection

- Building chute refuse & linen transfer
- Residential area waste collection
- Sport, leisure and retail complexes
- Transport and infrastructure

Sewerage & Wastewater Treatment

- Vacuum sewerage systems
- Domestic sewage treatment
- Wastewater re-use
- Tank pump-out systems

Environmental Systems & Monitoring

- Photovoltaic aeration for lagoons
- Natural treatment solutions
- Utility monitoring and metering
- Remote tank monitoring and metering

Rockbourne

ENVIRONMENTAL

Rockbourne Environmental is a leading integrator of cost-effective water, waste and environmental solutions, uniting intelligence and technology to deliver a cleaner, sustainable, built environment:

- Housing developments
- Multi-occupation units & tower blocks
- Towns & villages
- Sports facilities & leisure parks
- Retail complexes
- Motorway service stations
- Airports, train stations, ports & harbours
- Water & waste companies

Design, install, operate, maintain and finance solutions for:

Vacuum Sanitation

Vacuum building sanitation provides water savings and offers flexible leak-free piping not constrained by gravity

- 1-litre flush WCs
- Grease collection systems
- Small bore flexible pipework

Vacuum Sewerage Systems

Vacuum sewerage offers efficient collection of sewage and wastewater from buildings, towns, facilities and transport infrastructure

- Central collection stations
- Non-leak & flood-proof sewers
- Pump-out systems

Vacuum Waste Handling

State-of-the-art vacuum systems for refuse, paper, organic waste and linen collection in buildings and urban developments

- Automated waste collection
- Waste sorting & compacting
- Fast, efficient & non-labour

Sewage & Wastewater Treatment

Packaged treatment plants for sewage and grey water with re-use capability

- Domestic sewage treatment
- Rainwater harvesting
- Grey water systems
- Treated water re-use

Environmental Systems

- Solar aerators & mixers
- GSM & radio telemetry
- Remote sensing, monitoring & metering

Delivering a cleaner environment

Rockbourne Environmental is a leading solutions integrator for water, waste and environmental applications, uniting innovation and technology to deliver cleaner, more sustainable, urban and rural environments.

Today, our business is growing rapidly to meet market demands, utilising an expanding portfolio of products and technologies, underpinned by a policy of leading-edge research and development.

We work closely with our clients to tailor solutions from the best processes and products available, unconstrained by any in-house portfolio. This independent approach - combined with the company's multi-disciplinary methodologies and our team's in-depth knowledge of the many technologies involved - ensures our clients receive the most effective life-time costed solutions obtainable that deliver a cleaner environment.

From initial pilot study through to site operation and maintenance, Rockbourne Environmental works closely with its clients to develop a whole life costed solution that delivers a cleaner environment.
